JOB MATCH: 67%

FIT: PARTIAL FIT

RECOMMENDATION: Consider improving your resume first

JOB FIT RESULT

Overall Match: 67%

Fit Status: PARTIAL FIT

MATCHING SKILLS

- Python
- SQL

MISSING SKILLS

- REST API

ADDITIONAL SKILLS

- Numpy
- Pandas
- Matplotlib
- Sklearn
- C
- Java
- Natural Language Processing (NLP)
- Linear Regression Modeling
- Leadership and Marketing (Computer Society of India Club)
- Spoken English (GESE Trinity College London)

IMPROVEMENT SUGGESTIONS

- Incorporate a project that demonstrates the use of REST APIs, such as building a web service with Flask or FastAPI or consuming external APIs.
- Clearly define the specific database systems used (e.g., MySQL, PostgreSQL) rather than just listing SQL as a general certification.
- Clarify current employment or student status, as the graduation date of 2027 suggests you are an undergraduate student, which may impact eligibility for full-time roles.

FINAL VERDICT

The candidate is a partial fit because they possess two of the three core technical requirements: Python and SQL. However, the absence of REST API experience and the fact that the candidate appears to be a current student (graduating 2027) suggests they may need more practical development experience for a professional role.
